

Fly Ribbon 4 pk: M510

1. Bring to room temperature before opening by holding trap in your hand while making a fist for several minutes prior to attempting to open..
2. Grasp cord in one hand; grasp tube in the other.
3. Pull out cord slowly while turning tube in a counterclockwise (twirling) motion.
4. Cap will pop out. Remove thumbtack from top of cap and save for hanging.
5. Discard cap.
6. Remove completely from tube or let tube dangle from strip as an anchor. Hang with thumbtack or cord.
7. When strip is full or controlling flies is achieved, remove from hanging device and discard.

Note: In case of contact with sticky material, wash hands with soap and water. Avoid placing traps in dusty areas as this will cause the glue to lose it's adhesive qualities.
